[Congratulations to Philip Kitcher](#) [3]

Philip Kitcher's [Living with Darwin: Evolution, Design, and the Future of Faith](#) [4] (Oxford U.P., 2006) was the recipient of a Lannan Literary Award for Notable Book for 2008 from the Lannan Foundation, which "hopes to stimulate the creation of literature written originally in the English language and to develop a wider audience for contemporary prose and poetry." The [award](#) [5] includes a \$75,000 prize. A supporter of NCSE, Kitcher is the John Dewey Professor of Philosophy at Columbia University.

Discussing *Living with Darwin* in *BioScience*, NCSE deputy director Glenn Branch [wrote](#) [6] (PDF) that Kitcher's aim was "not only to debunk intelligent design and expound the case for evolution but also 'to respond to the concerns of the thoughtful people who are beguiled by the advertisements for intelligent design, to expose just what it is that is threatening about Darwinism, and to point to the deeper issues that underlie this recurrent conflict' ... He succeeds brilliantly."
